

INTERESTS	<b>Theoretical Computer Science:</b> Cryptography, Large Language Models, Combinatorics	
EDUCATION	<b>University of California, Los Angeles</b>	Sept. 2021–June 2025
	<ul style="list-style-type: none"> <li>B.S. Mathematics &amp; B.S. Computer Science. GPA: 3.96/4.00                             <ul style="list-style-type: none"> <li>Coursework: <i>Graph Theory, Linear Algebra (Honors), Numerical Analysis (Honors), Real &amp; Complex Analysis (Honors), Theory of Computation, Data Structures &amp; Algorithms, Software Construction.</i></li> </ul> </li> <li>M.A. Mathematics. (Integrated Masters - Departmental Scholar's Program.) GPA: 4.00/4.00                             <ul style="list-style-type: none"> <li>Graduate coursework: <i>Cryptography, Complexity, Probability, Discrete Math, Measure Theory.</i></li> </ul> </li> </ul>	
RESEARCH	<b>Machine Learning - Watermarking Large Language Models, UCLA</b>	Nov. 2023–Present
	<ul style="list-style-type: none"> <li>Mentored by Prof. Amit Sahai                             <ul style="list-style-type: none"> <li>Co-authoring a research paper that provides experimental evidence refuting assumptions made in <a href="#">Watermarks in the Sand</a>. <a href="#">GitHub link</a>.</li> <li>Used PyTorch and Pandas for machine learning, natural language processing and data manipulation.</li> <li>Worked on text processing and API integration, notably with OpenAI's GPT models.</li> </ul> </li> </ul>	
	<b>Cryptography - Multiparty Computation, UCLA</b>	March 2023–Present
	<ul style="list-style-type: none"> <li>Mentored by Prof. Rafail Ostrovsky, Prof. Vassilis Zikas.                             <ul style="list-style-type: none"> <li>Co-authoring a research paper (follow-up to <a href="#">GIOZ17</a>) proving upper and lower bounds on secure multiparty computation (MPC) with sublinear communication in the presence of a mobile adversary.</li> <li>A work in progress can be found <a href="#">here</a>.</li> </ul> </li> </ul>	
ACTIVITIES	<b>Theory@UCLA</b>	March 2023–Present
	<ul style="list-style-type: none"> <li>President &amp; Co-Founder                             <ul style="list-style-type: none"> <li>Established UCLA's first theoretical computer science student organization; recruited over 40 undergraduate and graduate students.</li> <li>Collaborated in learning topics in lattice-based cryptography and secure multi-party computation.</li> <li>Organized a <a href="#">reading group</a> meeting weekly to present topics in the mathematics underlying theoretical computer science.</li> </ul> </li> </ul>	
	<b>Olga Radko Endowed Math Circle, UCLA</b>	June 2022–Present
	<ul style="list-style-type: none"> <li>Lead Instructor                             <ul style="list-style-type: none"> <li>Conducted weekly 2 hour problem-solving sessions for advanced high-school students.</li> <li>Taught 3 different levels - Intermediate 2A, Advanced 2A and Advanced 3 - and approx. 80 students.</li> <li>Designed worksheets in topics including <a href="#">graph theory</a>, <a href="#">error-correcting codes</a> and <a href="#">optimization</a>.</li> </ul> </li> </ul>	
	<b>Prometheus (Hybrid) - Rocket Project, UCLA</b>	Dec. 2021–June 2022
	<ul style="list-style-type: none"> <li>Lead Engineer, Trajectory Simulations                             <ul style="list-style-type: none"> <li>Programmed a 6 degree-of-freedom simulation model in MATLAB for the hybrid fuel rocket team at UCLA.</li> <li>Simulation was used to predict rocket apogee, off-the-rail-speed, and stability during ascent.</li> <li>Designed an optimal thrust curve for the motor using OpenRocket.</li> </ul> </li> </ul>	
PROJECTS	<b>SimplyTasks</b>	Jan. 2023–March 2023
	<ul style="list-style-type: none"> <li>Front-end, task manager <a href="#">web app</a> <ul style="list-style-type: none"> <li>Used React, Node.js, HTML and CSS to program a calendar heat-map for tasks color-coded according to urgency.</li> <li>Other features of the app include ability to store user data on the back-end; users can add tasks, sub-tasks, sort by various preferences and view tasks in calendar mode.</li> </ul> </li> </ul>	
	<b>Math Animations</b>	June 2020–Aug. 2020 & July 2021–Aug. 2021
	<ul style="list-style-type: none"> <li>Programmed <a href="#">math animations</a> using a Python library, Manim.                             <ul style="list-style-type: none"> <li>Provided visual aids in trigonometry and calculus for tutoring during the lockdown.</li> <li>Created explanatory <a href="#">videos</a> for an internship with DiagKNOWstics Learning, an online platform.</li> </ul> </li> </ul>	
HONORS	Ostrovsky Summer 2023 scholarship for research in computer science at UCLA.	2023
	Dean's Honors List every quarter at UCLA	2021-2023
	IB Diploma World Topper: Final score of 45/45	2021
	Passed the American Math Contest (AMC 12) and qualified for AIME	2019
SKILLS	<i>Programming Languages &amp; Frameworks:</i> Python, PyTorch, Pandas, MATLAB, React, Node.js, C++ <i>Other:</i> L <sup>A</sup> T <sub>E</sub> X, Vim, Emacs, SolidWorks, OpenRocket, 3D Printing
